

Current Scenario of Ethanol in India (as of July 2025)

Crude Oil Substitution

Through Ethanol Blending Program (EBP) the nation has achieved a **crude oil substitution** of **193 lakh tonnes** over the last decade

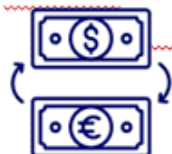

As of Dec 2024

Emission Reduction

CO2 emission reduction of **698 lakh metric tonnes** has been achieved till now

Foreign Exchange Savings

EBP has cumulatively resulted in **foreign exchange savings** of **INR 1.36 Lakh Crores**

Revenue for Farmers and Distillers

OMCs have disbursed **INR 1.96 Lakh Crores** to distillers and **INR 1.18 Lakh Crores** to farmers

Industry Readiness

All vehicles post-April 2025 developed for E20, since April 2023 are material-compliant; Many FFVs have already been developed

Policy & Long-Term Commitment

Current E20 framework stable till 2026; higher blends will be assessed only after thorough evaluation
