

India has met its ambitious target of achieving 20% ethanol blending (E20) in petrol, five years ahead of the original 2030 deadline.

Ethanol Blending with Petrol

Data is based on Ethanol Supply Year (ESY), reported year-wise.

ESY for 2022-23 taken for Dec'22-Oct'23 & thereafter changed to ethanol supplies between 1st November of current year to 31st October of the following year.

*ESY for 2024-25 is for Nov'24-June'25
